

DOUBLE INFLATED FILM

COME INTO THE WORLD OF
RICHEL'S MULTISPAN GREENHOUSES

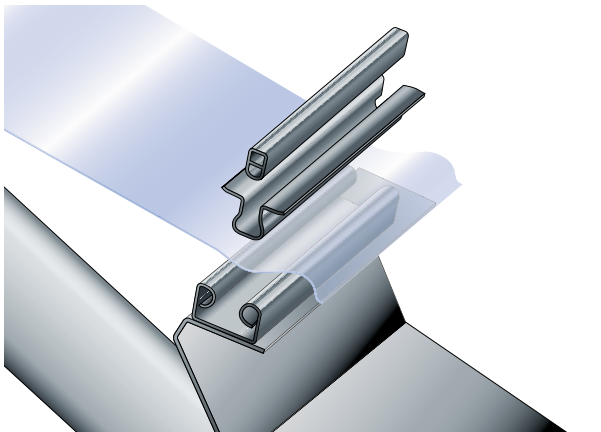

Choosing a RICHEL multispans greenhouse means not only benefiting from the latest technology, but also from the expertise of the top European manufacturer and inventor of the double inflated plastic covered greenhouse:

- Integrated research department.
- A manufacturing capacity in excess of 250 ha/year.
- Full range of equipment.
- Erection teams dispatched worldwide.

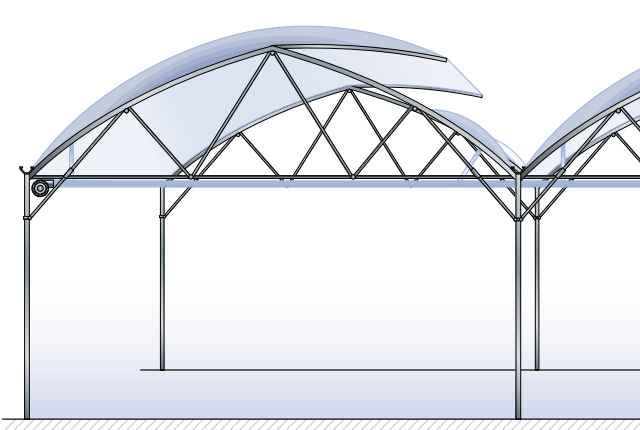

Technology developments (international patents) and the constant need for innovation and quality characterise the designs of the RICHEL range.

RICHEL's multispans greenhouses are available in an extensive range from 6.40 m to 12.80 m in width, with 20%, 35%, 40% and 50% vents.

All our greenhouses maximise the factors required for successful crops: ventilation, volume, space, light, structural strength, adaptability.
