

In 2008, RICHEL introduces further innovations to produce an even better corrosion-resistant greenhouse

A **PROTECTIVE COATING**

on our Z 275 galvanized square and rectangular sections

INNOVATION 2008

✓ Inert and rustproof COATING that protects the structure from the onset of white corrosion

✓ A protection against corrosion which is at least equivalent to that provided by a Z 450 steel

Richel's coated structural tube, the most efficient protection against corrosion

Salt Spray Test (accelerated conditions for metal corrosion)

Types of treatment	Appearance of white corrosion CETIM TESTS*	Appearance of red corrosion CETIM TESTS*	Appearance of red corrosion MANUFACTURERS' DATA**
GALVANIZED STEEL Z 275	24 h	250h	200h
GALVANIZED STEEL Z 450	24 h	400h	340h
GALVANIZED STEEL Z 275 + COATING	120h	650h	750h

*Salt Spray Test (accelerated conditions for metal corrosion): November 2007, CETIM tests data supplied by way of illustration, which does not render us liable

** Manufacturers' data: laboratory testing, results given by way of illustration, which does not render us liable
